

BIOGRAPHY

Richard Semmes **VP Consulting, Services & Support** **NovaQuest**

As Vice President of Consulting, Services, and Customer Support Richard Semmes is responsible for the definition, creation, and optimal utilization of PLM implementation skills and knowledge base as well as customer satisfaction.

Prior to joining NovaQuest, Mr. Semmes held various positions at Dassault Systemes including Director of R&D, ENOVIA Core Industries Strategy responsible for ENOVIA Solutions covering the Aerospace and Defense, Automotive, Industrial Equipment, and Shipbuilding industries. In this role, Mr. Semmes was responsible for defining and delivering best-in-class, industry-specific solutions that maximize out-of-the-box capability for the Core industries. Previous roles in Dassault Systemes include the global leader for ENOVIA strategy and Director of Lifecycle Applications development.

Prior to joining Dassault Systemes in 2000, Mr. Semmes worked at Lockheed Martin Aeronautical Systems Company in Marietta, GA, for six years, and was responsible for the deployment of Product Data Management (PDM) solutions. He has also served as an Aerospace Engineer in the United States Air Force, Aeronautical Systems Division, supporting both the F22 and B2 Programs.

Mr. Semmes holds an Aerospace and Ocean Engineering degree from Virginia Tech and has authored various publications in the field of aerospace propulsion systems and computational fluid dynamics.
